

ABSTRACT OF THE DISCLOSURE

A lamp shade includes a shade provided with a first ring and a second ring, and a support structure mounted in the shade and located between the first ring and the second ring. The support structure includes a main frame mounted
5 between the first ring and the second ring, and a plurality of support bars mounted between the first ring and the second ring. Thus, the lamp shade can be folded when not in use, so as to reduce the volume of the lamp shade, thereby facilitating package, storage and transportation of the lamp shade, and thereby decreasing the costs of package and transportation.
